PROJECTS

SakshatAI | React.js, Node.js, Express.js, MongoDB, Firebase, OpenRouter

May 2026

- Built a full-stack AI interview simulator with voice/text interaction, dynamic interview sessions, and automated candidate evaluation using React.js, Node.js, Express.js, and MongoDB.
- Integrated OpenRouter AI models to generate adaptive interview questions, follow-up questions, personalized feedback, scores, and performance insights.
- Implemented Firebase authentication, REST APIs, timed interview workflows, and deployed the application on Render for end-to-end interview simulation.

BitsnipAI | React.js, Node.js, Express.js, MongoDB, OpenRouter, NPM

July 2026

- Built a full-stack AI-powered React UI platform that generates reusable JSX components from natural-language prompts using the OpenRouter API.
- Developed and published a reusable NPM UI component library with live previews, source-code viewing, usage guides, and personal component storage.
- Implemented JWT authentication, Firebase/Google OAuth, Redux Toolkit state management, credit-based AI generation, and role-based admin controls.

Bellezaa | React.js, JavaScript, Node.js, Express.js, MongoDB, Groq, JWT

June 2026

- Built a full-stack AI-powered skincare platform providing personalized skincare recommendations, routines, and intelligent product suggestions.
- Developed secure REST APIs with JWT authentication, bcrypt password hashing, and MongoDB/Mongoose for user management and personalized data handling.
- Integrated Groq LLM for conversational skincare assistance, ingredient analysis, acne guidance, and customized morning/night skincare routines.
